

jQuery Mobile School – Video 2

Adding UI Elements

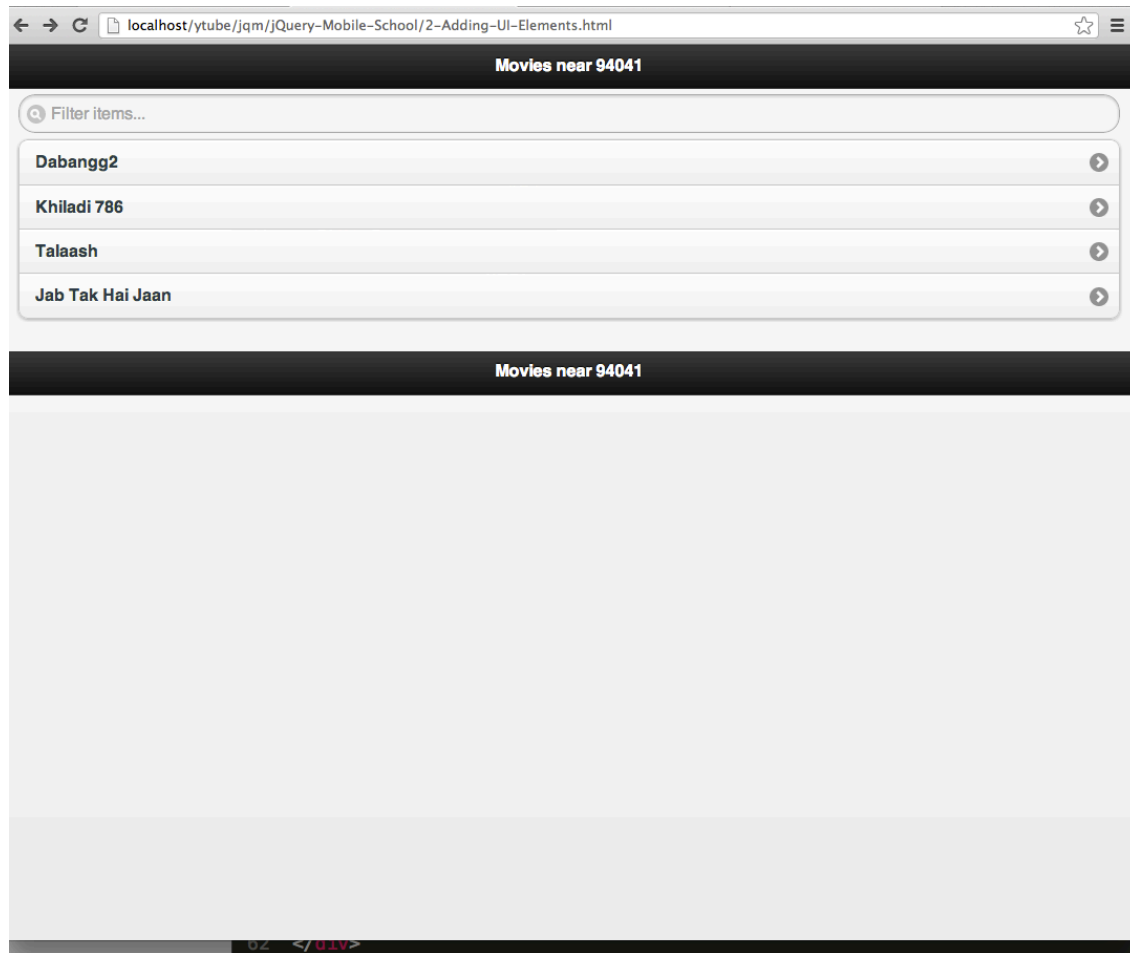

In this Video

- We will learn about adding UI Elements
 1. Buttons
 2. List View
 3. Search Box
 4. Navigation

Final Output on Mobile Device

Same output on web browser (chrome in this example)

Code –Adding Main page

```
<div data-role="page" id="mainPage">
  <div data-role="header">
    <h4>Movies near 94041</h4>
  </div>
  <div data-role="content">
    <ul data-role="listview" data-inset="true" data-filter="true">
      <li><a href="#Dabangg2" data-transition="slide">Dabangg2</a></li>
      <li><a href="#Khiladi786" data-transition="slide">Khiladi 786</a></li>
      <li><a href="#Talassh" data-transition="slide">Talaash</a></li>
      <li><a href="#JTHJ" data-transition="slide">Jab Tak Hai Jaan</a></li>
    </ul>
  </div>
  <div data-role="footer">
    <h4>Movies near 94041</h4>
  </div>
</div>
```

Code – Adding sub page

```
<div data-role="page" id="Dabangg2">
  <div data-role="header">
    <a data-rel="back" data-direction="reverse" href="#mainPage">Back</a>
    <h1>Dabangg2</h1>
  </div>
  <div data-role="content">
    </img>
  </div>
  <div data-role="footer">
    <h4>Dabangg2</h4>
  </div>
</div>
```

6 new data attributes 😊

- Data-role = “list-view”
- Data-inset= “true”
- Data-filter= “true”
- Data-transition= “slide”
- Data-rel= “back”
- Data-direction= “reverse”

Recap

- 6 new data* attributes for :
- Adding UI Elements
 1. Button
 2. List view
 3. Searching
 4. Navigation

Up Next

- Dialogs
- Popups
- Page Transitions
- Themes

Thanks !
